

Congressman Jerry Carl, US Representative for Alabama's 1st District, recently visited Lenzing's Mobile, Alabama facility to help commemorate the 30th anniversary of TENCEL™ lyocell. The Mobile facility was the first commercial scale operation to produce TENCEL™ lyocell in the world with Lenzing's production capabilities now expanding to five commercial TENCEL™ lyocell production facilities globally.

Congressman Carl joined the team at Lenzing Fibers Inc. to commemorate 30 years of success and highlighted Alabama was proud to be the home of the first commercial TENCEL™ lyocell operation. Alan Brown, President of LFI, highlighted that the first bale of TENCEL™ was produced on June 23, 1992 and 30 years later our business continues to grow.

Rep. Carl met with the LFI staff, toured the manufacturing facility and then had a small Town hall event with representatives of the manufacturing team
